Donor Doc®

Electronic Donor Health History Solution

Streamline your donor history process.

Donor Doc software can help you improve safety, reduce errors and omissions, minimize discarded products, enhance your donors' experience, and increase your center's efficiency and productivity.
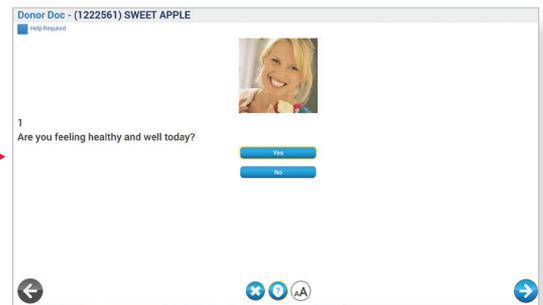

The benefits of using our Donor Doc software include:

- Increase your center's efficiency by streamlining the collection and review of donor history information.

- Enhance donor satisfaction by leveraging technology to further verify a donor's identity using digital signature capture and picture capabilities.

- Customize to meet your organizational needs by accessing critical information originating from the host donor management system using table-driven flexibility.

- Promote safety by immediately identifying donor responses where additional staff investigation may be necessary.

- Leverage key system functionality by helping to implement a paperless process for storing and accessing all donor responses electronically.

Improved User Interface

Are you feeling healthy and well today?

Yes

No

Features to help you

Helps reduce incomplete questionnaires
- Prohibits skipped questions and requires completion of follow-up questions before donation which can be completed at home or in your facility.

Streamlines your donor health screening process
- Eliminates the need for manual entry or maintenance of paper records.
- Tracks historical travel information, physical exam and pre-donation results.
- Helps save time and costs by no longer requiring peripheral devices.

Stores data electronically online
- Retrieves data easily, whether collected onsite or during blood drives, including digital signatures and donor photographs.
- Features a web tablet administration application.
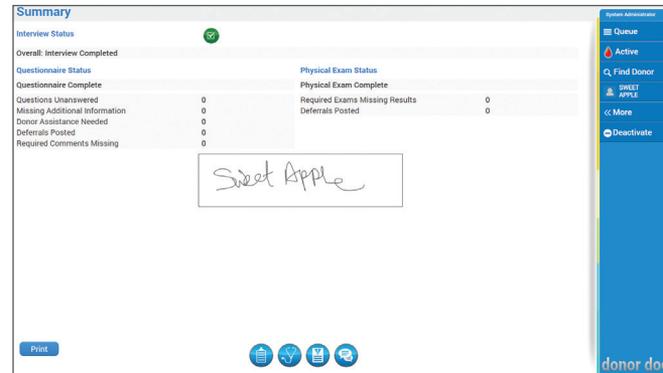

Encourages donor self screening
- Allows donors to proceed through the health history process at a personalized pace on a standard PC, tablet PC, tablet, or touch screen.
- Enhances the experience with intuitive screens, audio and text in multiple languages and informational graphics.

Enhances processes through configurable software
- Maintains a variety of questionnaire's for different donations including customized questionnaires which feature the ability to highlight, bold, italicize and change font size.
- Provides ability to implement a secondary review of responses by licensed staff, supervisors, and team leads.
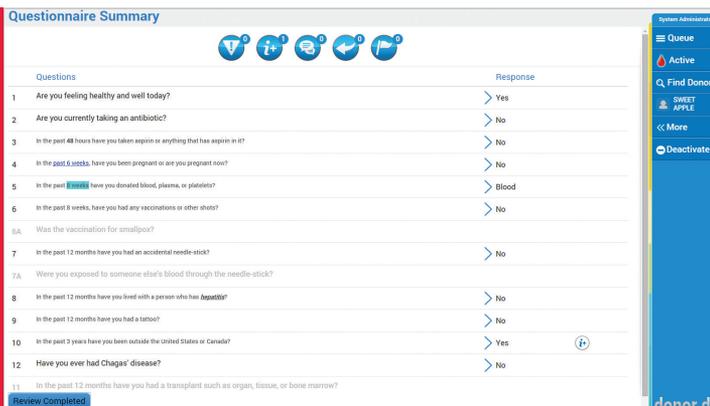

Interfaces with blood management systems
- Supports standards and regulations including AABB's Uniform Donor History Questionnaire standards.

Donor Doc® Technical Platform
- Windows®-based – Oracle® RDBMS compatibility with standard third-party database tools
- Centralized deployment and upgrade administration
- Database model provided and documented
